

# HPP 90/8

## Descrizione

The pump is designed to pump clean and non-explosive liquids, without abrasive and filamentary parts in suspension and with a viscosity not exceeding 20mm<sup>2</sup> / s.

## Applicazioni

The pump is designed for industrial applications:

- Machine tools (grinding, lathes, drilling centers)
- Glass processing machines
- Filtration systems
- Cooling systems
- Washing machines

### ***Operating conditions***

Liquid temperature from -15 ° C to + 90 ° C - Maximum ambient temperature + 40 ° C.

**Electric motor:**

The pump is equipped with a closed construction motor, with external ventilation, built according to IEC 60034-30-1 in IE3 (Premium Efficiency) efficiency class. Motor protection degree IP 55.

"

**Dati di targa**

Attributo	Valore
Potenza 1 (kW)	1,76
Potenza 2 (kW)	1,5
Conn. Idraulica (")	1 1/4
Portata Massima (l/min)	137
Prevalenza Massima (mt)	60
Dim max impurità (mm)	0,003
Tipo girante	Closed

**Materiali**

	Materiale	Opzione Materiale
Girante	Aisi 416	
Corpo Pompa	Cast iron	
Chiocciola	Aisi 416	
Albero	Aisi 416
