

SACEMI GAMAR

Rev.00_2025

ALWAYS IN MOTION, ALWAYS AT THE TOP

**The new Sacemi Gamar mixer:
the secret to a cleaner, more efficient
and longer-lasting coolant.**

Installing a mixer means ensuring a coolant that is always homogeneous, without separation or unpleasant odors.

Its continuous action prevents bacterial growth, reduces deposits on the tank bottom and extends the life of both coolant and tools.

The result? Higher machining quality, fewer downtimes, reduced maintenance and a healthier, more productive work environment.

**A small device, big advantages
for the whole production.**

CONSTANT HOMOGENEITY

PREVENTION & CLEANLINESS

DURABILITY & SAVINGS
